BACKGROUND

Coastal Electrics is a versatile electrical contractor that has firmly established itself in the electrical industry through prioritising exceptional service and a client-centric approach. We specialise in servicing the Industrial, Commercial, Mining and Resource sectors across Western Australia, underpinning our robust foundation.

Leveraging a highly proficient and dependable team, as well as a modern vehicle fleet and specialised equipment, Coastal Electrics provides a comprehensive array of services customised to meet the specific needs of each client. Our focus is on collaborative engagement with our clients from project inception to completion, aiming to optimise client satisfaction. At Coastal Electrics, we actively promote our personnel to engage their technical expertise, think innovatively, and explore every avenue to achieve the most favorable project results.

Coastal Electrics recognises its employees as our most valuable assets and therefore are committed to providing them with ongoing training, development, and support. Coastal Electrics retains quality employees by providing a mixture of in-house and external training as well as ongoing development and support options. Personnel are encouraged to continually pursue growth and development opportunities in their respective fields. The training and development of employees has ensured Coastal Electrics can continually provide quality delivery across our project base. Keeping our employees satisfied with the level of training they receive ensures the company maintains high performing, cohesive and loyal employees.

As a family run business one of our key focuses is work/life balance. We strive to provide family friendly hours and rosters to assist our employees in achieving and maintaining this balance.

Coastal Electrics has strong equal opportunity values, with apprentices and qualified tradesmen from various cultural backgrounds. We value each other's diverse balance of experience and knowledge, working together in a non-discriminatory environment. Coastal Electrics strongly believes in the importance of training apprentices in the electrical industry and has had 20 successfully trained apprentices to date. Wherever possible, Coastal Electrics employ local team members to ensure local knowledge is readily available and sustained within the business.

MISSION, VISION & VALUES

Mission

To excel in delivery to through maintaining the highest industry standards and fostering strong relationships with our clients.

Vision

To become the most respected, sought after delivery partner, providing an unmatched service throughout Australia

Values

- *Electrical Apprenticeship Training*

SERVICE OFFERINGS

Design, Installation & Commissioning

Coastal Electrics leverages its extensive industry expertise and experience to offer a comprehensive range of electrical design, installation, and commissioning services across various sectors, including commercial, industrial, mining, and resources. Our services encompass:

- Construction of fixed plant E&I infrastructure and equipment.
- Installation of substations, transformers, and switchyards.
- Cabling and terminations for HV, LV, and ELV control, instrumentation, and communications.
- Instrumentation installation, testing, and calibration.
- Installation of HV and LV switchboards.
- Installation, splicing, and terminations of fibre optic cables.
- Testing and auditing for HV, LV, and communications systems.
- QA/QC inspections and client representation.
- Services for testing, pre-commissioning, commissioning, and post-commissioning.

Maintenance & Repairs

Coastal Electrics maintenance and repair solutions offer peace of mind by minimizing downtime and ensuring the peak performance of electrical infrastructure and assets. For our clients, this translates into reduced operational costs, enhanced reliability, and prolonged equipment life. Our comprehensive services encompass:

- Modifications, upgrades, overhauls, rebuilds, and repairs.
- Maintenance and repair of both HV and LV infrastructure.
- 24/7 rapid response to breakdowns and technical support.
- Development and implementation of proactive maintenance programs.
- Assessment and monitoring of equipment condition.
- Evaluation of diagnostic data.
- Enhancements to asset performance and efficiency.

Workshop

Coastal Electrics operates two purpose-built, fully equipped electrical and fabrication workshops situated in Wedgefield (Port Hedland) and Rockingham, WA. These facilities grant us the capability to preassemble, conduct bench testing, and craft customised components before on-site installation. Each workshop is fully stocked with supplies for electrical, communications, fibre optics, and fabrication installations along with specialised equipment. Common activities conducted in these workshops include:

- Maintenance, repairs, and reconfiguration of switchboards (both HV and LV).
- Electrical assembly of distribution boards, switchboards, and other tailored enclosures.
- Cleaning, inspection, testing, and refurbishment of lighting, generators, and mobile machinery.
- Servicing, maintenance, and repair of End Of Train (EOT) devices.
- Fabrication of custom frames, brackets, and covers.
- Fit-outs for transportable workshop and office containers.
